

PANGASINAN STATE UNIVERSITY
Urdaneta Campus

BACHELOR OF SCIENCE INFORMATION TECHNOLOGY

COURSE SYLLABUS

1ST Semester, A.Y. 2026-2027

COURSE INFORMATION	
COURSE CODE	URD_CC101_IT (1st year)
COURSE TITLE	Introduction to Computing
COURSE TYPE	☐ Lecture ☐ Laboratory ☒ Lecture & Laboratory
COURSE CREDIT	2/1
CLASS HOURS	90
COURSE PREREQUISITE/ CO-REQUISITE	None
COURSE SCHEDULE	IT 1A – T 3:00-5:00pm & Th 10:00-1:00pm ; IT 1B M 1:00-3:00pm & F 8:00-11:00am
UNIVERSITY VISION, MISSION, QUALITY POLICY, INSTITUTIONAL OUTCOMES AND PROGRAM OUTCOMES	
UNIVERSITY VISION	To become a leading industry-driven State University in the ASEAN region by 2030
UNIVERSITY MISSION	The Pangasinan State University shall provide a human-centric, resilient, and sustainable academic environment to produce dynamic, responsive, and future-ready individuals capable of meeting the requirements of the local and global communities and industries.
EOMS POLICY	The Pangasinan State University shall be recognized as an ASEAN premier state university that provides quality education and satisfactory service delivery through instruction, research, extension and production. We commit our expertise and resources to produce professionals who meet the expectations of the industry and other interested parties in the national and international community. We shall continuously improve our operations in response to changing environment and in support of the institution's strategic direction.
INSTITUTIONAL OUTCOMES	The Pangasinan State University Institutional Learning Outcomes (PSU ILO) are the qualities that PSUnians must possess. These outcomes are anchored on the following core values: Accountability and Transparency, Credibility and Integrity, Competence and Commitment to Achieve, Excellence in Service Delivery, Social and Environmental Responsiveness, and Spirituality – (ACCESS). Anchored on these core values, the PSU graduates are able to: 1. Demonstrate through institutional mechanisms, systems, policies, and processes which are reflective of transparency, equity, participatory decision making, and accountability;

	- Engage in relevant, comprehensive and sustainable development initiatives through multiple perspectives in decisions and actions that build personal and professional credibility and integrity. - Set challenging goals and tasks with determination and sense of urgency which provide continuous improvement and producing quality outputs leading to inclusive growth; - Exhibit life-long learning and global competency proficiency in communication skills, inter/interpersonal skills, entrepreneurial skills, innovative mindset, research and production initiatives and capability in meeting the industry requirements of local, ASEAN and international human capital market through relevant and comprehensive programs; - Display, socially and environmentally responsive organizational culture, which ensures higher productivity among the university constituents and elevates the welfare of the multi-sectoral communities and; - Practice spiritual values and morally upright behavior which promote and inspire greater harmony to project a credible public image.		
PROGRAM OUTCOMES	Graduate Attribute	Program Outcomes	Performance Indicators
	People's Champion	PO8. Function effectively as a member or leader of a development team recognizing the different roles within a team to accomplish a common goal (CTS-3)	Team member: 1) Independently source necessary knowledge, assistance, skills and resources to complete tasks. 2) Perform tasks effectively to accomplish a common goal. Leader of a team: 3) Set proper goals and timeline of activities to complete team objectives. 4) Allocate task according to team member capabilities. 5) Monitor task completion and performance of team members. 6) Provide expertise, assistance and support to team members to achieve team goals. 7) Resolve and reduce conflicts within the team.
		PO9. Assist in the creation of an effective IT project plan (CTS-3) (ILO-1)	1) Perform task in the creation of an effective IT project plan. 2) Create an effective IT project plan.
	Continuous-Innovative Learner	PO13. Recognize the need for and engage in planning self-learning and improving performance as a foundation for continuing professional development (CTS-1) (CTH-3) (ILO-4)	1) Reflect on own abilities and skills to determine necessary development needs to reach level of expectations and aspirations as a computing professional. 2) Prepare a personal development plan for continuing professional development. 3) Engage independently in developmental activities (like participating in professional organizations, attendance to seminars and training) as a result of recognizing the need to further and continuously develop one's competencies as a computing professional. 4) Evaluate achievements and deficiencies against own's personal development plan.

	Community Developer	PO11. Analyze the local and global impact of computing and information technology on individuals, organizations, and society (CTS-4) (CTH-1) (ILO-2) (ILO-5) (ILO-6)	1) Analyze the local impact of computing and information technology on individuals, organizations, and society. 2) Analyze the global impact of computing and information technology on individuals, organizations, and society. 3) Make design and implementation decisions considering the impact of IT on individuals, organizations, and society. 4) Provide /conceptualize solutions to domain where IT is needed 5) Evaluate the impact of these solutions to individuals, organizations, and society.
		PO12. Understand professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology (CTS-4) (CTH-1) (ILO-2) (ILO-5) (ILO-6)	1) Make decisions considering professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology 2) Assess professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology
	Knowledgeable and skilled IT Professional and Communicator	PO1. Apply knowledge of computing, science, and mathematics to address real problems appropriate to the discipline (CD-2)	1) Identify or determine the techniques, tools, methodologies to be used given a particular scenario that involves computing, science, and mathematics. 2) Compare different tools, techniques, methodologies as to their pros and cons that will help in decision making.
		PO2. Distinguish best practices and standards and their applications.	1) Identify the characteristics that conform to standards and their best practices. 2) Compare and contrast tools and methodologies in terms of best practices, standard and their application.
		PO3. Analyze complex problems and identify and define the computing requirements appropriate to its solution (CD-1)	1) Analyze complex problems. 2) Identify and define the complexity requirements appropriate to its solution.
		PO4. Identify and analyze user needs and take them into account in the selection, creation, evaluation and administration of computer-based systems (CD-1) (ILO-1)	1) Analyze the user's needs and take them into account in the selection, creation, evaluation and administration of computer-based systems. 2) Identify the user's requirements and take them into account in the selection, creation, evaluation and administration of computer-based systems.
		PO5. Design, implement, and evaluate computer-based systems, processes, components, or programs to meet desired needs and requirements under various constraints (CD-3) (ILO-1)	1) Translate specification into a design. 2) Design software to meet desired needs under various constraints. 3) Design a database to meet desired needs for storing data under various constraints. 4) Design networks to meet desired needs for sharing information under various constraints. 5) Design a hardware infrastructure to meet desired processing needs under various constraints.

			6) Implement a network to meet desired needs for sharing information under various constraints. 7) Implement database to meet desired needs for storing data under various constraints. 8) Implement a software/program to meet desired needs for task under various constraints. 9) Evaluate software/programs on its functionality and level of satisfying user requirements for task under various constraints 10) Evaluate an existing network for its level of satisfying user requirements for under various constraint.
		PO6. Integrate IT-based solutions into the user environment effectively (CD-3) (ILO-1) (ILO-3)	1) Implement a network to meet desired needs for sharing information under various constraints. 2) Implement database to meet desired needs for storing data under various constraints. 3) Implement software to meet desired needs for task under various constraints. 4) Evaluate software on its functionality and level of satisfying user requirements for task under various constraints. 5) Evaluate an existing network for its level of satisfying user requirements for under various constraint.
		PO7. Apply knowledge through the use of current techniques, skills, tools and practices necessary for the IT profession (CD-4)	1) Evaluate techniques, methodologies, standards/frameworks and tools for their appropriateness considering its advantages and limitations. 2) Select, use and adapt appropriate techniques, methodologies, standards/frameworks and tools.
		PO10. Communicate effectively with the computing community and with society at large about complex computing activities through logical writing, presentations, and clear instructions (CTS-2) (CTH-2)	1) Interview clients to gather background information, situation, existing concerns and issues necessary to frame and achieve common understanding of problems to be addressed by computing solutions 2) Write effective reports and documentation about the results of performing specific computing and professional tasks 3) Write documentation (including design documentations) completely and comprehensively, with appropriate tone, correct grammar and construction, adapting to documentation standards, to communicate ideas, choices, assumptions, and consequences of decisions

			4) Develop effective presentation material that will enhance understanding of ideas being communicated 5) Deliver presentations effectively and efficiently to various audience (computing community, society at large, and users) using English and Filipino as needed, with appropriate tone, correct grammar and construction 6) Choose appropriate language suitable to the audience and respectful to the audience's background and culture 7) Provide clear instructions to team members
--	--	--	---

COURSE DESCRIPTION

This course provides an overview to IT concepts covering IT Professions and Careers, computing domains and different IT disciplines, appreciation of computing in different fields as well as the challenges in the field of information technology, both from a practical and theoretical perspective. It develops an appreciation for the pervasiveness of computing in our daily affairs and the requisite knowledge and skills to cope with the challenges in a wired society. It also deals with appreciation of the history of computing, computer systems its organization and architecture and basic knowledge on operating systems, computer security and networks, HTML5/CSS.

COURSE OUTCOMES

COURSE OUTCOMES (C0) At the end of the course, the student should be able to:		ILO	PO		SDG
			PO	LEVEL	
CO1	Explain fundamental principles, concepts, and evolution of computing systems	ILO1, ILO5	PO5	E	SDG 9 - Industry, Innovation and Infrastructure
CO2	Perform problem analysis and identify computing requirements on computing problems	ILO1, ILO3	PO5 PO7	E I	SDG 9 - Industry, Innovation and Infrastructure
CO3	Analyze solutions employed by organizations to address different computing issues	ILO1, ILO4, ILO5	PO3 PO11	I I	SDG 9 - Industry, Innovation and Infrastructure
CO4	Expand on the recent developments in the different computing knowledge areas	ILO2, ILO5, ILO6	PO9 PO11	I I	SDG 9 - Industry, Innovation and Infrastructure
CO5	Assess and make decisions on professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology	ILO1, ILO4, ILO6	PO5 PO7 PO11 PO12	I I I I	SDG 16 - Peace, Justice and Strong institutions
CO6	Reflect on own abilities and skills to determine necessary development needs to reach level of expectations and aspirations as a computing professional	ILO4, ILO5	PO7 PO11	I I	SDG 8 - Decent Work and

					PO12	I	Economic Growth
*I. (Introduced) P. (Practiced) D. (Demonstrate)							
COURSE LEARNING PLAN							
Course Outcome/s	Learning Outcomes	Topics	Hours		Learning Activities	Learning Materials and Platform	Assessment
	Discuss the VMGO of the University. Discuss course requirements and the grading system.	CLASS ORIENTATION - PSU Vision Mission and Core Values - BSIT Program and Course Outcome - Classroom Policies - Grading System - Course Requirements	1		- Discussion - Recitation of the PSU Vision, Mission, ILOs, POs and COs	PSU Student Handbook	
CO4, CO6	Lecture LO: - Identify technical and non-technical IT skills, certifications, and current trends in the IT profession. - Explain the significance of IT skills, certifications, and computing applications in various industries. - Analyze how emerging trends and issues influence the IT profession and workforce. Laboratory LO: - Apply criteria in comparing computing applications across different fields and industries.	Chapter 1: Overview of the IT industry - General IT Skills - Technical Skills Non-technical Skills - IT Certifications - Appreciation of Computing in Different Fields - Trends and Issues in the IT Profession	3	5	LECTURE - Attendance - Lecture/Discussion - Quiz - Seatwork - Interactive Sessions LABORATORY - Attendance - Demo - Seatwork - Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative Written

	2. Analyze the technical and non-technical competencies required in selected IT careers.					<i>readers, text-to-speech tools)</i> <i>Watch pre-recorded lecture video with captions & transcript.</i>	Laboratory Report • Laboratory Exercises Case Studies
CO4, CO6	Lecture LO: 1. Identify the different career opportunities in the field of IT. 2. Explain the roles and scope of the different computing disciplines and professions. 3. Analyze the relationships among computing disciplines, knowledge areas, and career opportunities. Laboratory LO: 1. Compare and contrast the different domains, disciplines, and knowledge areas of computing.	Chapter 2: Domains of Computing a. Professions and Careers in the Computing Field b. Computing Disciplines c. Computing Knowledge Areas	3	5	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork • Interactive Sessions LABORATORY • Attendance • Demo • Seatwork • Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools) <i>Watch pre-recorded lecture video with captions & transcript.</i>	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative • Written Laboratory Report • Laboratory Exercises Case Studies
CO1	Lecture LO: 1. Explain and describe the technological development of computing from historical perspective. Laboratory LO:	Chapter 3: Evolution of Computing a. Computer Generations b. Classification of Computers	3	5	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork	LECTURE Learning Materials; Modified Handouts; Presentations; Module	LECTURE Formative Quizzes, Graded Recitation. Seatworks)

	1. Identify the classification of computers. 2. Create a timeline or classification chart illustrating the evolution and types of computers.				• Interactive Sessions LABORATORY • Attendance • Demo • Seatwork • Lab Quiz	LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools) Watch pre-recorded lecture video with captions & transcript.	Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative • Written Laboratory Report • Laboratory Exercises Case Studies
CO1	Lecture LO: 1. Dissect and explain the basic elements of a computer system. Laboratory LO: 1. Explain the function and interaction of various subsystems of a digital computer. 2. Create a functional block diagram illustrating the interaction of the components of a computer system.	Chapter 4: Key Components of a Computer System a. Hardware • Processor • Memory • I/O Devices b. Software • System Software • Application Software c. Peopleware	3	5	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork • Interactive Sessions LABORATORY • Attendance • Demo • Seatwork • Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i>	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress

						– Allow assistive technology use (screen readers, text-to-speech tools) Watch pre-recorded lecture video with captions & transcript.	Report Summative • Written Laboratory Report • Laboratory Exercises Case Studies
CO1 CO4	Lecture LO: 1. Explain the types/classifications, components, topology, standards, channel organization and the different network protocols. 2. Discuss the different networking technologies. Laboratory LO: 1. Design a Network Topology 2. Create a straight through cabling using UTP cable.	Chapter 5: Computer Networks a. Definition of Computer Networks b. Classifications of Network (according to distance covered) c. Transmission Media d. Channel Organization e. Networking Components f. Network Topology and Protocols g. Straight through Cabling	3	5	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork • Interactive Sessions LABORATORY • Attendance • Demo • Seatwork • Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools) Watch pre-recorded lecture video with captions & transcript.	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative • Written Laboratory Report • Laboratory Exercises Case Studies
MIDTERM EXAMINATION 3 hours (1hr lecture and 2hrs laboratory)							

CO1, CO3, CO4	Lecture LO: 1. Discuss ethics in the IT profession and privacy. 2. Explain the vulnerabilities of computing platforms. Laboratory LO: 1. Discuss the different technologies and tools for protecting computer systems. 2. Distinguish computer security from controls.	Chapter 6: Computer Security, Ethics and Privacy a. Background of Computer Ethics and Ethics and Society b. Philippine E-commerce Law c. Ten commandments of Computer Ethics d. Network Attacks e. Computer Security Risks f. Information Privacy g. Health concerns of computer use	3	5	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork • Interactive Sessions LABORATORY • Attendance • Demo • Seatwork • Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools) Watch pre-recorded lecture video with captions & transcript.	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative • Written Laboratory Report • Laboratory Exercises Case Studies
CO4	Lecture LO: 1. Differentiate computer organization from computer architecture. 2. Explain the different levels/layers of a computer. Laboratory LO: 1. Describe the evolution of Multilevel Machines 2. Explain the von Neumann Architecture	Chapter 7: Difference between Computer Organization and Computer Architecture a. Why Study Computer Organization? b. Computer as Multilevel Machine c. Evolution of Multilevel Machines d. Von Neumann Architecture	3	5	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork • Interactive Sessions LABORATORY • Attendance	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment

					• Demo • Seatwork • Lab Quiz	<i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools) Watch pre-recorded lecture video with captions & transcript.	LABORATORY Formative Quiz, Recitation, Progress Report Summative • Written Laboratory Report • Laboratory Exercises Case Studies
CO3	Lecture LO: 1. Describe numbering systems and their use in data representation. 2. Compare different data representation methods. 3. Demonstrate the conversion of one number system to another number system. 4. Discuss the subtraction using 1s and 2s complement. Laboratory LO: 1. Perform the arithmetic operation on binary numbers.	Chapter 8: Number System a. Binary b. Decimal c. Octal d. Hexadecimal	5	9	LECTURE • Attendance • Lecture/Discussion • Quiz • Seatwork • Interactive Sessions LABORATORY • Attendance • Demo • Seatwork • Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools)	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative • Written Laboratory Report

						Watch pre-recorded lecture video with captions & transcript.	- Laboratory Exercises - Case Studies
CO3, CO4	Lecture LO: 1. Present and discuss the HTML5 document structure. Laboratory LO: 1. Identify and demonstrate the use of the different HTML tags and CSS	Chapter 9: HTML Tags CSS Styles	5	6	LECTURE - Attendance - Lecture/Discussion - Quiz - Seatwork - Interactive Sessions LABORATORY - Attendance - Demo - Seatwork - Lab Quiz	LECTURE Learning Materials; Modified Handouts; Presentations; Module LABORATORY Learning Materials; Modified Handout; Presentations; Module <i>FOR LEARNERS WITH SPECIAL NEEDS (Physically Challenged)</i> – Allow assistive technology use (screen readers, text-to-speech tools) Watch pre-recorded lecture video with captions & transcript.	LECTURE Formative Quizzes, Graded Recitation. Seatworks) Summative Chapter Test or Long Quiz/ or Weekly Test Performance-based assessment LABORATORY Formative Quiz, Recitation, Progress Report Summative - Written Laboratory Report - Laboratory Exercises - Case Studies

FINAL EXAMINATION 3 hours (1hr lecture and 2hrs laboratory)

Total no. of Hours: 90

RUBRICS

Oral Presentation	Category	Max Points	4 - Excellent	3 - Good	2 - Needs Improvement	1 - Poor
	Content & Strategy	12 pts	The pitch clearly and compellingly presents a well-researched strategy. All key components (e.g., problem, solution, market, competition) are addressed with strong evidence.	The pitch presents a clear strategy, and most key components are addressed with some supporting evidence.	The pitch lacks a clear strategy, and several key components are missing or weakly supported.	The pitch is unfocused and lacks a discernible strategy or key components.

	Clarity & Organization	10 pts	The presentation is logically structured and easy to follow. The main message is clear and concise. The use of visuals is highly effective.	The presentation is generally well-organized, with a clear message. The use of visuals is adequate.	The presentation is disorganized, making it difficult to follow the main message. Visuals are confusing or sparse.	The presentation is completely unstructured, with no clear message or supporting visuals.
	Delivery & Engagement	10 pts	Presenters speak clearly and confidently, making strong eye contact. They engage the audience effectively and handle questions with expertise.	Presenters speak clearly and show confidence. They engage the audience reasonably well and answer questions adequately.	Presenters' speech is often unclear or hesitant. They struggle to engage the audience and have difficulty answering questions.	Presenters read directly from notes, show a lack of confidence, and fail to engage the audience or answer questions.
	Professionalism	8 pts	The pitch is polished, professional, and within the time limit. All team members contribute meaningfully to the presentation.	The pitch is professional and mostly within the time limit. Most team members contribute.	The pitch lacks professionalism and exceeds the time limit. Team contributions are uneven.	The pitch is unprofessional, disorganized, and well over the time limit. Some team members do not contribute.
Written Outputs	Category	Max Points	4 - Excellent	3 - Good	2 - Needs Improvement	1 - Poor
	Content & Analysis	12 pts	The output provides a thorough, insightful, and well-supported analysis. All parts of the prompt are addressed completely and accurately.	The output provides a clear analysis, and most parts of the prompt are addressed. Arguments are generally supported with evidence.	The analysis is superficial or inaccurate. Key parts of the prompt are not addressed, and evidence is weak or absent.	The output lacks analysis and does not address the prompt.
	Organization & Structure	10 pts	The document is logically structured with clear headings, a strong introduction, and a cohesive conclusion. Ideas flow smoothly and are easy to follow.	The document is generally well-organized. The introduction and conclusion are present but could be stronger.	The document lacks clear organization and is difficult to follow. The introduction and conclusion are weak or missing.	The document is disorganized and incoherent, making it impossible to understand the main points.
	Clarity & Writing Quality	10 pts	The writing is clear, concise, and free of grammatical, spelling, or punctuation errors. The vocabulary is appropriate for the subject matter.	The writing is clear with only minor errors. Vocabulary is generally appropriate.	The writing contains frequent errors in grammar, spelling, or punctuation, which may impede understanding.	The writing is difficult to understand due to numerous and severe errors.

	Supporting Evidence	8 pts	All claims are supported by strong, relevant, and properly cited evidence from credible sources.	Most claims are supported by relevant evidence. Citations are present but may contain minor errors.	Claims are often unsupported by evidence. Citations are inconsistent or incorrect.	The output contains no evidence to support claims and lacks proper citations.
AI Integration						
		4 -Excellent	3 - Satisfactory	2 -Fair	1 - Poor	
	Over-all AI integration	Consistently demonstrates innovative, ethical, and highly effective AI integration that significantly enhances teaching and student learning.	Effectively integrates AI to support instruction and learning while adhering to ethical standards.	Demonstrates basic AI integration with limited effectiveness or consistency.	Minimal or inappropriate use of AI with little evidence of enhancing teaching and learning.	
	Ethical and Tolerable Use of AI	AI was used only within the allowed purpose of the task. The student clearly disclosed the AI tool used, how it was used, and showed that the final work remains substantially his/her own.	AI use appears acceptable but disclosure is limited or unclear. The work shows some student input, but AI assistance may have contributed too much to wording, organization, or ideas.	AI use may have gone beyond the tolerated or allowed purpose. Disclosure is vague or missing in some parts. The work shows signs of overreliance on AI or weak student ownership.	AI use was unauthorized, undisclosed, or used to replace the student's own work. The submission misrepresents AI-generated content as entirely original student work.	

Homebased Activity	CRITERIA	PERCENTAGE DISTRIBUTION	Excellent	Good	Fair	Poor	NO SUBMISSION
	Originality of Work	30	All subsections are original indicating that the output was done independently	One subsection is copied from other's outputs	Two or more subsections of the outputs were copied from other's works/ outputs	All subsections are copied from other's outputs	absent
	Date of submission	20	Submitted on time	Submitted one day after the deadline	Submitted 2-3 days after the <u>deadline</u>	Submitted 4 or more days after the <u>deadline</u>	absent
	Completeness of answers	20	All subsections were answered (Maps/ images/ tables present, concepts were	One subsection was not answered	Two to three subsections were not answered	Three or more subsections were not answered	absent
	Correctness of answers	30	All answers are correct. Answer is complete; sufficient detail provided to support assertions; answer focuses only on issues related to the question; factually correct	One subsection is incorrectly answered. Answer is brief with insufficient detail. Unrelated issues were introduced and/or minor errors in content.	Two or to three subsections were incorrectly answered. Answer is incomplete. Excessive discussion of unrelated issues and/or significant errors in content	All answers are incorrect. The essay did not answer the question	absent
	TOTAL	100					

Essay	Category	10	7	5
	Ideas and Content and Relevance of answers	The paper clearly states an opinion and gives 3 clear detailed reasons in support of it.	An opinion is given. One reason may be unclear or lack details.	The opinion and support for it is buried, confuse, and/or unclear.
	Organization	The paper has a beginning with an interesting lead, a middle, and an ending. It is an order that makes sense. Paragraphs are intended and have topic and closing sentences and main ideas.	The paper has a beginning, middle, and ending. The order makes sense. Paragraph are indented; some have topic and closing sentences.	There is no real beginning or ending. The ideas are seem loosely strung together. No paragraph formatting.
	Word Choice	Descriptive words are used. The author uses words that are direct and easy to understand.	Few attempts at descriptive words. The author uses words that quite difficult to understand.	The same words are used over and over. Some words are incorrectly, and the author used words that are difficult to understand.
	Direction	Properly observe in abiding the guidelines and direction of answering and submission.	Make less than 5 mistakes in abiding the guidelines and direction of answering and submission.	Make a lot of mistakes in abiding the guidelines and direction of answering and submission.
	Originality	Observe proper usage of references. citations. and does not steal ideas from other person.	Content 70% original, some did not observe the proper usage of references. citations. and does not steal ideas from other person.	Content is less than 70% original, some did not observe the proper usage of references. citations. and does not steal ideas from other person.

C. <u>Performance-Based Assessment</u>	<u>30%</u>	

COURSE POLICIES AND EXPECTATIONS**Class Attendance (Article 2, Section 14 of PSU Student Handbook)**

1. If you have a record of ten (10) unapproved absences from the class, and/or have been absent for more than 20 percent of the required number of hours without any valid reason, you will be automatically dropped from the subject.
2. Approved absences are limited only to illness as certified by a physician, death of a family member, official and authorized representation of Campus/University in official function/ activities and other reasons as may be deemed justified by your instructor.
3. For excused absences, it is your responsibility to seek out missed assignments. You should check the official PSU LMS, official class FB page/group messenger and your classmates for notes, handouts, etc.

Classroom Expectations**1. Be Prepared**

- Your grade is your sole responsibility. Earn the good grade you deserve by coming to class prepared. Complete reading assignments and other homework before class so that you can understand the lecture and participate in discussion. Have your homework ready to submit and always bring your book, notebook, paper and writing materials. You are not allowed to borrow anything from your classmates to ensure avoidance of virus transmission. This is for your health's safety. Also, each of you is assigned to be the prayer leader for the day. If you are assigned to lead, please be ready with your prayer. (Accountability, Credibility and Integrity, Spirituality)

2. Be Participative

- Be ready and willing to participate in classroom discussions. Contribute proactively to class discussions. Do not hesitate to ask questions during class discussions. Remember, you came to school to learn. (Competence and Commitment to Achieve Excellence)

3. Be Punctual

- Seat plan will be used for the checking of attendance. If you are not on your designated area once the class has started, you will be considered late/absent. Submit your homework/problem sets/ class activities on time too. (Accountability, Competence and Commitment to Achieve Excellence)

4. Be Respectful.

- Any action that bothers another student or the teacher, or any disruptive behavior in class, is considered disrespectful. Demonstrate proper respect for teachers, your classmates, other university personnel and all university property. Listen to others and evaluate ideas on their own merit. (Social Responsiveness)

5. Be Tidy.

- Cleanliness is next to Godliness. Wear your complete proper uniform. Likewise, your activities must be clean and properly stapled. Loose leaves are prone to be misplaced. Your clean work reflects that homework/problem sets are well-prepared. Before leaving the classroom, please make sure that your place is clean. Pick up litters and throw them on the designated trash bins. (Accountability, Credibility and Integrity, Competence and Commitment to Achieve Excellence, Social and Environmental Responsiveness)

Technology Agreement

1. The use of electronic devices such as laptops, tablets and cell phones inside the classroom is **ONLY ALLOWED WITH MY PERMISSION**. Charging of your electronic devices is prohibited inside the class. Please make sure they are fully charged before bringing them to class.
2. Cell phones and other devices need to be set in silent mode. For emergency purposes, please request to take the call/answer the text message outside the classroom.

Academic Honesty and Class Conduct

1. Cheating in Examination and Quizzes (Article 14, Section 1-n of PSU Handbook):
 - 1st offense : Automatic grade of 5.00 in the particular examination where cheating occurred; referral to guidance counselor.
 - 2nd offense : Automatic grade of 5.0 if done on the same subject and/or other subjects and suspension for one semester.
 - 3rd offense : Automatic grade of 5.0 in the subject/s and suspension of one semester to dismissal from the institution.

Guidelines on Late Submissions of Requirements and Late Examinations

1. Requirements must be submitted within the designated date of submission. Any work submitted late will be given deductions, however, leniency will be observed.
2. You are only allowed to take missed major examinations, quizzes and activities due to approved absence. For missed major examinations please fill in the **Request for Special Examination** and have it approved by the Department Chairperson and College Dean before taking the missed exam.

Lecture Class Policies

1. Please stay home if you are unwell.
2. Attendance in the class signifies readiness to participate in class discussions and activities.
3. A student is responsible for his/her absence.
4. A student will be automatically marked DRP (Dropped) after eight (8) consecutive absences.

5. Requirements must be submitted within the designated date of submission.
6. Use of cellphones or electronic devices is not allowed at any time. All school rules will be followed as stated in the student handbook.
7. Late work: Deductions will be given; however, leniency will be observed.
8. Others (agreed upon by the class)

Guidelines for examination (Article 2, Section 14 of PSU Student Handbook)

Examinations are integral components of instruction and shall be administered by the instructor/professor subject to University policies/rules for the purpose of evaluating student performance. It limits to the following conditions:

- a. As a general rule, mid-term and final examinations are administered each semester.
- b. Students who failed to take mid-term and final examinations because of illness and/or some other serious reasons may be allowed to take a special examination upon presentation of valid documents.
- c. The academic performance of the students shall be evaluated and graded at the end of each term in accordance with the prescribed grading system.
- d. There are two major examinations scheduled during the semester- midterm and final examinations announced in the University school calendar.
- e. Students must observe strictly honestly and silence during examinations. As a general rule, student who cheat during the periodical examinations get a failing mark for the examination.

University-wide AI Use Statement and General Guidelines across all Courses

Guided by the Artificial Intelligence Assessment Scale (AIAS) developed by Perkins et.al (2024) and BOR Approved Policy on Artificial Intelligence in Teaching and Learning (Reso. No. 19, s2026), the following shall be adopted to guide AI use in assessment tasks:

Level	Decision	Description	Specific Assessment Task
<u>1</u>	<u>No AI</u>	<u>The assessment is completed entirely without AI assistance. This level ensures that students rely solely on their knowledge, understanding, and skills.</u> <u>AI must not be used at any point during the assessment.</u>	<u>Mandated examinations</u> <u>Quiz</u> <u>Chapter test</u>
<u>2</u>	<u>AI-assisted idea generation and structuring</u>	<u>AI can be used in the assessment for brainstorming, creating structures, and generating ideas for improving work.</u> <u>No AI content is allowed in the final submission</u>	<u>Final Outputs</u>
<u>3</u>	<u>AI-assisted editing</u>	<u>AI can be used to make improvements to the clarity and quality of student created work to improve the final output, but no new content can be created using AI.</u> <u>AI can be used, but your original work with no AI content must be provided in an appendix.</u>	<u>Reflection/Reaction papers, Book review, Journal, essays, and similar assessments</u>
<u>4</u>	<u>AI Task Completion, Human Evaluation</u>	<u>AI is used to complete certain elements of the task, with students providing discussion or commentary on the AI-generated content.</u> <u>You will use AI to complete specified tasks in your assessment. Any AI created content must be cited.</u>	<u>Reflection/Reaction papers, Book review, Journal, essays, and similar assessments</u> <u>Group discussion, brainstorming, or idea generation, grammar correction</u>

5	Full AI	AI should be used as a “co-pilot” to meet the requirements of the assessment, allowing for a collaborative approach with AI and enhancing creativity. You may use AI throughout your assessment to support your own work and do not have to specify which content is AI-generated.	Not applicable	
- The faculty is advised to contextualize the assessment task based on the discipline, course or subject handled. - The approved guidelines on the responsible use of artificial intelligence in teaching, learning, and assessment at Pangasinan State University can be accessed through this link https://tinyurl.com/yveapdbe. <u>Guidelines in the responsible and ethical use of AI for Students (BOR Reso No. 19, s. 2026)</u> <u>Students should adhere to and respect any restrictions or limitations set by the faculty on AI use in the subject or discipline.</u> <u>Students should clearly disclose any AI-supported or AI-generated content, if such is allowed in the subject, completing the PSU AI Declaration Form (FM-AA-IM-03 Rev.0 01-Jan-2026).</u> <u>Students may be allowed to upload their instructor’s work (such as but not limited to syllabus, instructional materials, written feedback, correspondence) into AI generative tool with permission from the instructor. On the other hand, the same are not allowed to be uploaded to publicly accessible online platforms such as LinkedIn, Coursera, Reddit, Amazon, Tiktok, among others, .</u> <u>For research and creative work, students must disclose the intended use to their adviser and panel, identify the AI assisted tool used, and describe the actual Gen AI use in the final output.</u> <u>Students shall critically review and verify AI-assisted content and shall be fully accountable for the contents, results and conclusions of their research or creative work.</u> <u>Students must ensure that all data collection and data use comply with applicable laws and regulations, hence must exercise caution when uploading texts, datasets, images, or files to Gen AI tools.</u>				
REVISION HISTORY				
REVISION NUMBER	DATE OF REVISION	DATE OF IMPLEMENTATION	HIGHLIGHTS OF REVISION	
2022-01	September 9, 2022	September 19, 2022	1. Revised the order of chapters covered 2. Revised the computation of grades (based on the new BOR approved assessment) 3. Followed the new format of syllabus 4. Alignment of the COs to the ILOs and new Pos.	
2023-02	August 14, 2023	August 22, 2023	1. Inclusion of new vision and mission 2. Addition of new resources	
2025-03	August 12, 2025	August 18, 2025	1. Inclusion of SDG Mapping 2. Inclusion of learning activities for learners with special needs
